ANNUAL SUMMARY OF COMPLETIONS

ANNUAL SUMMARY OF COMPLETIONS:
DEGREES GRANTED AND OTHER FORMAL AWARDS
CONFERRED BY ARKANSAS COLLEGES AND UNIVERSITIES, 1990-91

Arkansas higher education institutions awarded a record number of degrees and other formal awards in 1990-91. In all, 12,533 awards were conferred, representing a 2.8% increase over the previous year, and an 11.7% increase over the 1986-87 academic year. The largest percentage of growth over the previous year occurred at the specialist level, where the number of awards rose from 47 to 60. Other award levels which have increased from 1989-90 are certificates, associate, baccalaureate, and first-professional degrees. Completion trends over the last five years for public and private Arkansas colleges and universities are illustrated in Figure 1.

Depictions of completions for the 1990-91 academic year are shown in Table 14. Bachelor's degrees comprise 61.9% of the total awards, making this degree level the most popular in both the public and independent sector. Associate and master's degrees, at 30.5% of total, also account for a significant percentage of completions.

In the following pages, certain trends in Arkansas public higher education completions are analyzed. The Planning and Research Division of the Arkansas Department of Higher Education is very interested in your reaction to this report and welcomes any comments or questions you may have.

FIVE-YEAR TREND AT ARKANSAS PUBLIC COLLEGES AND UNIVERSITIES

The number of degrees and other awards in Arkansas public colleges and universities, at 10,812, reflected a five year high in 1990-91. Arkansas public institutions increased the number of completions by 3.0% over the 1989-90 year and 1,193, or 12.4%, since 1986-87. Figure 2 illustrates the steady growth over the last five years. This growth is entirely consistent with the enrollment growth in the public institutions over the same time period. As stated on the previous page, increases occurred at most degree levels. Those degree levels which declined from the previous year were post bachelor's certificates, master's and doctoral degrees, and post first-professional certificates.

1. Associate Degrees

Associate degrees awarded by Arkansas public colleges and universities have significantly increased in the past two years. In a one-year time period from 1988-89 to 1989-90, the number of awards rose by 17%. Some of the two-year institutions told ADHE last year that this was due to an increased marketing effort on their part to encourage those students in college-transfer programs to apply for the degree. It appears that this practice is working as the number of associate degrees awarded in 1990-91, at 2,052, is the highest ever awarded in the state of Arkansas, according to records maintained by ADHE.

Table 15 shows the most popular associate degree programs in Arkansas public higher education. Liberal/General Studies (24), Health Sciences (18), and Business and Office (07) remain the three most popular programs. Liberal/General Studies continues to account for the majority of associate degree awards. However, while the number of awards in this field rose by 39, the percentage of total awards declined. This is due to an increase of 139 associate degrees awarded in Health Sciences, which in 1990-91, rose by 5.31 percentage points over the previous year. The disciplines of Business and Office (07) and Engineering and Engineering-Related Technologies (15), while continuing to stay in the top five rankings, declined both in number and percentage of graduates from 1989-90 to 1990-91. Allied Health (17), which has not been among the top five in associate degree production since 1985-86, was the fifth largest in degree production in 1990-91, comprising 4.53%.

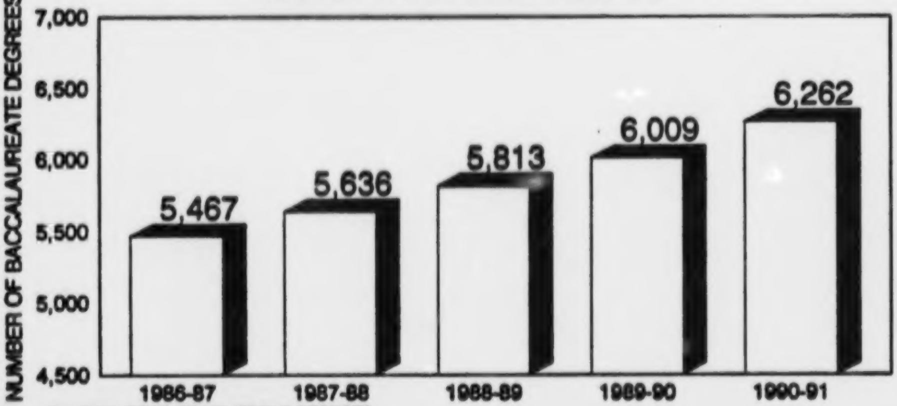
2. Baccalaureate Degrees

As with many other degree programs, Arkansas public universities awarded a record number of bachelor's degrees. Bachelor's degrees in 1990-91 totalled 6,262 and according to historical reports at ADHE, this is the highest number awarded since 1977-78. This figure represents a 14.5% increase from 1986-87 and a 4.2% increase from 1989-90. In recent times, an abundance of information has been relayed through various media about the benefits of a bachelor's degree and the difference in the economic well being of those with and without a bachelor's degree. It is apparent that the message is having an impact in that more Arkansans than ever before are receiving a baccalaureate degree.

FIGURE 4. BACCALAUREATE DEGREES CONFERRED BY ARKANSAS PUBLIC INSTITUTIONS, 1986-87 THROUGH 1990-91



SOURCE: IPEDS COMPLETIONS REPORTS

As shown by Table 16, Business and Management (06) degrees continue to account for the largest number of baccalaureate awards. According to the 1991 edition of the *Digest of Education Statistics*, Business and Management degrees comprised 24.2% of all baccalaureate degrees awarded in the United States in 1988-89, the most recent year for which data is available. However, Social Sciences (45), which ranks fourth in popularity in Arkansas is the second most popular baccalaureate program in the nation. Education (13) degree awards in Arkansas public universities, which rose from 1988-89 to 1989-90, experienced a small decline in 1990-91. As in other degree levels, Health Science (18) awards significantly increased in the 1990-91 academic year, marking a 13.5% increase over the previous year and a 36.0% increase over 1988-89. Overall, the top five bachelor's degree programs in Arkansas public higher education accounted for over 60% of all baccalaureate awards.

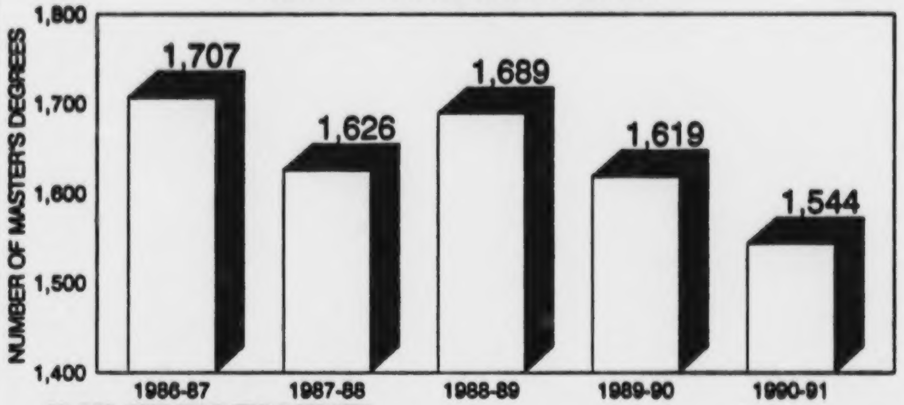
3. Master's Degrees

For the third consecutive year, the number of master's degrees awarded by Arkansas public universities is down. Only two institutions reported increases in 1990-91, and these increases only amounted to 6 additional degrees. The total of master's degrees conferred amounted to 1,544 in 1990-91, a 4.6% decrease over 1989-90 and a 9.5% drop over the 1986-87 year. Figure 5 illustrates these changes.

FIGURE 5. MASTER'S DEGREES CONFERRED BY ARKANSAS PUBLIC INSTITUTIONS, 1986-87 THROUGH 1990-91



SOURCE: IPEDS COMPLETIONS REPORTS

For many years, Education has ranked as the most popular master's degree program, comprising 44.9% of all master's awards. Although this is so, the number of master's degrees in Education has been steadily dropping since 1986-87, shrinking by 13.2% since 1987-88.

Table 17 provides data on the top five ranked master's degree programs in terms of percent of awards. No change has occurred in the rankings; however, the numbers have changed significantly, particularly in the areas of Education (13) and Business and Management (06). These areas produce the most master's degree awards and both have shown marked decreases since 1988-89. Master's degrees in Health Sciences (18), as in other degree levels, has steadily increased over the last several years. Likewise, the number Public Affairs (44) awards have also increased over the past three years, in 1990-91, marking a 43.6% increase over the 1988-89 year and a 12.9% increase over the previous year. Overall, the top five master's degrees illustrated in Table 17 accounts for over 75% of all awards at this level for Arkansas universities.

4. Doctoral Degrees

Doctoral degrees conferred at the University of Arkansas, Fayetteville (UAF) declined in 1990-91. UAF conferred 118 doctorates in 1990-91, a drop of 5.2% over 1989-90 (see Figure 6). Prior to 1990, UAF was the only doctoral granting institution in the state, including six programs offered on the campus of the University of Arkansas for Medical Sciences. In 1990, the State Board of Higher Education approved a doctoral program in Instrumentation Sciences at the University of Arkansas at Little Rock.

SOURCE: IPEDS COMPLETIONS REPORTS

The field of Education continues to attract the largest number of doctoral students in Arkansas, accounting for over one-third of the doctorates received in 1990-91. Forty-four doctorates in Education were conferred in 1990-91, down from 46 in 1989-90 as shown in Table 18. According to the most recent data from the National Center for Education Statistics, doctoral degrees in Education account for 19% of all doctorates awarded in the nation. Programs in the Physical Sciences replaced Life Sciences in the number two ranking. Life Sciences and Psychology, each with 10 doctoral degrees conferred in 1990-91, both rank as the fifth most popular doctoral degree program in the state.

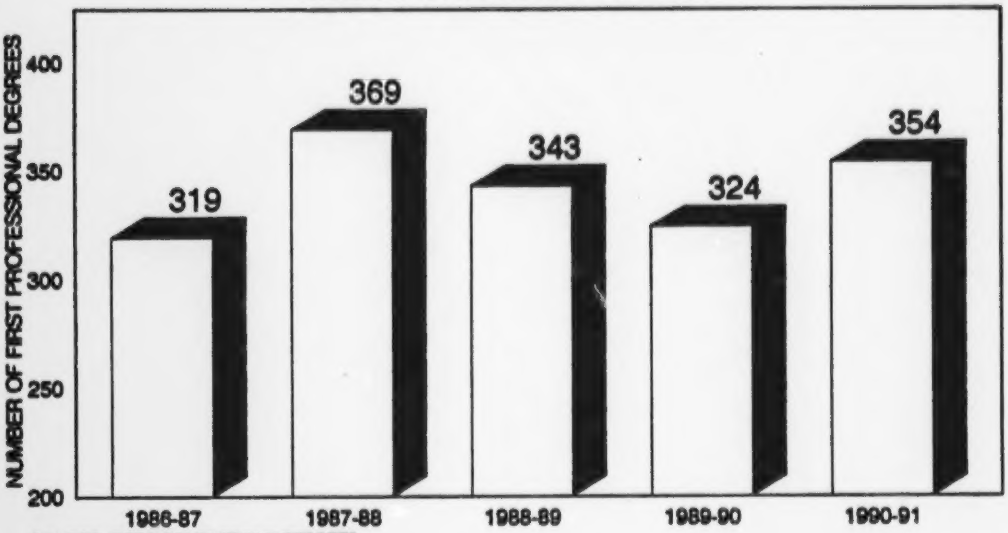
5. First Professional Degrees

As shown in Figure 7, Arkansas awarded 354 first professional degrees in 1990-91, an increase of 9.3% over 1989-90 and the highest number conferred since 1987-88. Three Arkansas institutions award first professional degrees. The University of Arkansas, Fayetteville (UAF) and the University of Arkansas at Little Rock (UALR) offer programs in Law, while the Medical Sciences campus (UAMS), offers programs in Medicine and Pharmacy.

FIGURE 7. FIRST PROFESSIONAL DEGREES CONFERRED BY ARKANSAS PUBLIC INSTITUTIONS, 1986-87 THROUGH 1990-91



SOURCE: IPEDS COMPLETIONS REPORTS

The number of law degrees increased 20.4% over 1989-90. UAF conferred 127 law degrees in 1990-91, up from 113 in 1989-90, and UALR conferred 115 degrees in law, 27 more than in 1989-90. UAMS conferred 112 degrees in medicine, down from 123 in 1989-90. First professional degrees in law, pharmacy, and medicine comprise 74% of the total number of first professional degrees conferred nationally, according to the latest data from the National Center for Education Statistics.

Summary

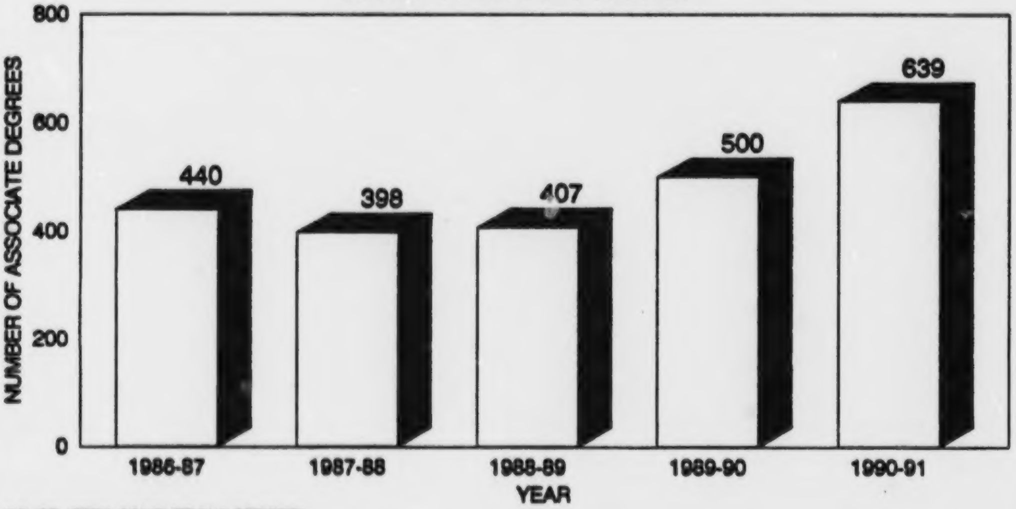
The rise in degree productivity overall indicates that the public has become well aware of the importance of obtaining a degree in higher education. This trend is expected to continue in view of the increased enrollment and college-going rate at Arkansas institutions of higher education.

DEGREE PRODUCTIVITY IN NURSING

Associate Degrees in Nursing

In 1990-91, Arkansas public institutions granted 639 associate degrees in nursing, a 27.8% increase over the previous year and the largest number in the last ten years. In 1987-88, the two year nursing programs in the state produced the lowest number of graduates since 1980-81. Since 1987-88, the number of associate degrees in nursing has grown dramatically each year, with an increase of 60.1% from 1987-88 to 1990-91. The five-year growth pattern in this field is illustrated in Figure 8.

FIGURE 8. ASSOCIATE DEGREES IN NURSING CONFERRED BY ARKANSAS PUBLIC INSTITUTIONS, 1986-87 THROUGH 1990-91



SOURE: IPEDS COMPLETIONS REPORTS

As shown by the accompanying table, the most growth in associate nursing degrees has occurred at the four-year institutions, where all but two institutions increased the number of graduates by at least 33.3% over the previous year. However, the two-year institutions experienced significant growth also, as all but one increased the number of graduates since 1989-90. Overall, the number of graduates at the two-year institutions has risen by 7.5% since 1989-90 and 35.8% since 1986-87, while at the four-year institutions, this number has risen by 50.6% and 53.9%, respectively.

Although the number of associate degrees in nursing is growing at an incredible pace, most public higher education institutions still report that they have long waiting lists to get into their nursing programs. Due to the current shortage of health care professionals, ADHE is studying the viability of offering nursing programs through telecommunications at various off-campus sites and funding these courses as on-campus programs.

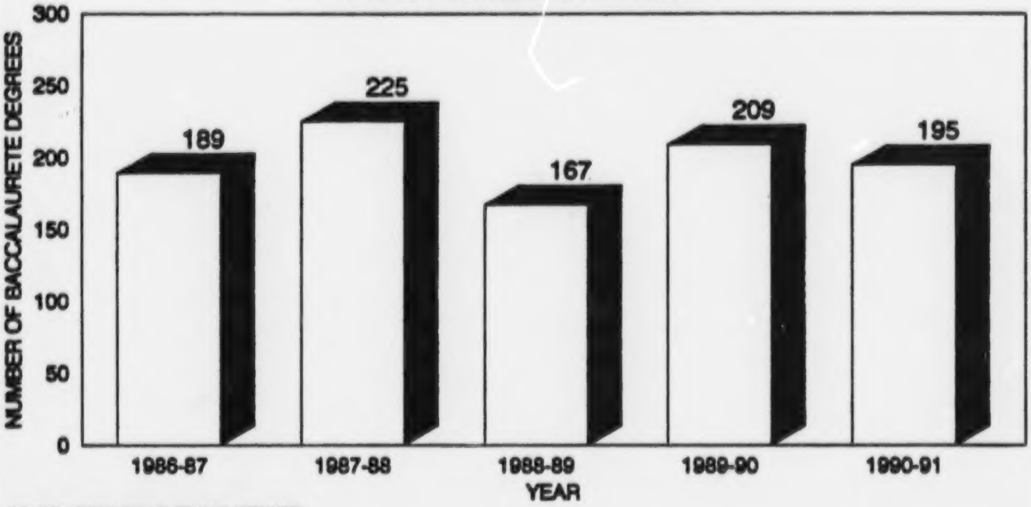
Baccalaureate Degrees in Nursing

In 1990-91, the number of baccalaureate degrees conferred in nursing dropped slightly from 209 to 195. The five-year trend in this program (illustrated in Figure 9) shows an up and down cycle, with the highest number (225) of degrees being awarded in 1987-88. Interestingly enough, in that same year, fewer associate degrees in nursing were conferred than ever before. Baccalaureate degrees in nursing dropped by 13.3% since 1987-88 and rose by 16.8% since 1988-89.

FIGURE 9. BACCALAUREATE DEGREES IN NURSING CONFERRED BY ARKANSAS PUBLIC INSTITUTIONS, 1986-87 THROUGH 1990-91



SOURE: IPEDS COMPLETIONS REPORTS

Currently, the seven public higher education institutions that offer baccalaureate degrees in nursing are ASUJ, ATU, HSU, UAM, UAMS, UAPB, and UCA. The largest concentration of these degrees is at UAMS, accounting for 44.6% of all baccalaureates awarded in nursing.

Shortage of nurses is a problem all over the country. It is especially noticable in Arkansas, as the demand for health care professionals dominates the employment advertisements. There are several reasons for this predicament: (1) faculty shortages hinder enrollment, (2) expensive laboratories and equipment are a limitation in an economically disadvantaged state like Arkansas, and (3) there is a lack of available clinical space for training.

Master's Degrees in Nursing

After peaking at 41 degrees in 1988-89, the number of master's awards in nursing has dropped significantly for the past two years. Since 1988-89, the number of graduates has declined by 29.3%. UAMS, which generally grants the most master's degrees in nursing, granted 17 in 1990-91, a 50% decline over the 34 degrees they awarded in 1988-89. UCA granted 12 degrees in this field in 1990-91, accounting for 41.4% of all master's in nursing. The other public higher education institution which awards master's degrees in the nursing field is ASUJ, which began a program in 1988-89. Figure 10 shows overall master's degree productivity in nursing.

The low degree productivity in master's level nursing is disturbing, particularly given the fact that nurses with this level of training are needed to become administrators and faculty members. This cycle of low productivity spawns long waiting lists for nursing schools as our public institutions struggle to retain and recruit nursing faculty.

SOURE: IPEDS COMPLETIONS REPORTS

REPORT OF DEGREE PRODUCTIVITY

DEGREE PRODUCTIVITY IN NEW PROGRAMS APPROVED BY THE STATE BOARD OF HIGHER EDUCATION

The following pages report the degree productivity for all new programs approved by the State Board of Higher Education since 1981. For each institution, the tables report degree awards by year for every new degree program. Productivity is low or non-existent in the first few years after a program has been established: students enrolling in the new program are at least two years away from completion. Programs approved in 1990 and 1991 have not been included in this report because they are unlikely to have any graduates until next year. These programs will be added to the report made to the Board in 1992.

Review of the data in this report shows that most programs established since 1981 meet the State Board's current productivity guidelines. These standards are currently under review with the chief academic officers. Utilizing a computerized database developed by the Department for this purpose, ADHE will make annual reports of degree productivity in newly-established programs; this information will also be taken into account in evaluating future new program proposals.

DEGREES GRANTED AND OTHER FORMAL AWARDS CONFERRED: SUMMARY TABLES BY ETHNICITY

The following tables show the numbers and percentages of degrees and other formal awards by the ethnicity of students. Note that row totals may not reflect the sum of black and white students. The differences reflect the number of students from other ethnic groups. These numbers are small and do not significantly affect the ethnic characteristics of the number of degrees and other formal awards conferred in Arkansas.
